

# Correct Behavior during Rocket Attack

**Make sure everyone hereabout hears the siren.**

**Guide those who are present and assist mobile patients to reach the nearest protected area.**

**Move immobile patients as far away from exterior windows as possible.**

**Close windows and doors after entering the protected area.**

**You may leave the protected area 10 minutes after the siren or sounds of explosions.**

**In case of injury, evacuation procedures must be followed in accordance with the instructions of those in charge on site.**
